SUMMARY

Full-Stack Developer with 1.6 years of hands-on experience building backend services and REST APIs in Python (Django, Flask, FastAPI), designing PostgreSQL databases, and integrating React front-ends with backend systems. Comfortable working across the stack — from database schema design to interactive dashboards — with additional experience in Docker, CI/CD pipelines, and AWS/Azure cloud deployment. Collaborative, detail-oriented, and quick to adapt to fast-paced, evolving project requirements.

TECHNICAL SKILLS

Backend: Python, Django, Flask, FastAPI, REST APIs, Microservices

Frontend: React, JavaScript, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB, SQLite, data modeling, query optimization

DevOps & Cloud: Docker, CI/CD, Git, GitHub, AWS, Microsoft Azure, Linux

AI & Data (Additional): LLM Integration, RAG Pipelines, LangChain, Pandas, NumPy

EXPERIENCE

Python Developer — Balkrishna Industries (BKT), Chh. Sambhajinagar

June 2025 – Present

- Developed, tested, and deployed backend services and REST APIs in Python using Django and FastAPI for an enterprise monitoring system, building reusable components that cut manual effort by 40%
- Designed and maintained PostgreSQL databases, optimizing schemas and queries to improve data retrieval performance and integrity for reporting features
- Built secure REST APIs in Flask and FastAPI with encryption and validation logic, integrating backend services with downstream applications
- Wrote clean, maintainable code and refactored existing Django/FastAPI modules, participating in peer reviews and technical discussions
- Engineered batch-processing pipelines in Python and Pandas to handle high-volume workloads reliably

Full Stack Developer — SBS Mindscript Software Solutions, Chh. Sambhajinagar

Nov 2024 – May 2025

- Built full-stack web applications end-to-end using Python, HTML/CSS, and JavaScript, working across backend and frontend for internal operational tools
- Developed RESTful APIs and integrated them with interactive front-end dashboards for real-time reporting and data visualization
- Set up automated CI/CD pipelines and Git-based workflows, shortening release cycles for the team
- Built production monitoring dashboards, collaborating closely with the team on architecture decisions

PROJECTS

Real-Time Production Monitoring System

Tech: Python, React, SQL, REST APIs

- Built a full-stack monitoring platform with a Python/REST API backend and a React front-end, tracking manufacturing and operational metrics
- Designed interactive React dashboards for machine performance, downtime analytics, and production insights
- Implemented a centralized backend architecture with a SQL database, reducing downtime-detection latency by 20%

Machine Recipe Management System

Tech: Python, FastAPI, SQL, Barcode/QR Integration, OCR

- Built a Python/FastAPI backend with SQL data models to automate recipe configuration workflows
- Integrated production monitoring APIs and automated data synchronization, reducing configuration errors by 35%

Merchant Onboarding Automation (LLM-Based)

Tech: Python, GoLang, Transformers, RAG, LangChain, AWS

- Built LLM-driven document-processing workflows on AWS, achieving 98–99% extraction accuracy on regulatory documents
- Automated document validation processes, reducing manual verification effort by 40%

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Python Development Certification — Infosys Springboard

- AI Master Engineering Program — In Progress

EDUCATION

Deogiri Institute of Engineering and Management Studies, Chh. Sambhajnagar

Bachelor of Technology, Electronics and Telecommunication Engineering — 2025
